\*1000 points were given to the winner of a particular race/class. Each of the remaining competitors was awarded 1000 points minus one point for each 3 seconds their time was over that of the winner of their class. Only the points for a competitor's top six races were counted. The final column labeled "adjusted placing" removes competitors who had points in a more competitive category. Your comments on this or other possible point systems are welcomed.
