

Halloween Orienteering and Night O
Campbell Tract
29 October 2005

We had three courses: the infamous Halloween O course (known to some as the candy course) where there were 9 controls each one creatively decorated in a wild Halloween theme and manned (complete with flying bats, Star Wars troopers, mutant spider nests, and more), as well as the Yellow and Orange night-O courses..

We had a total of 231 participants. The Halloween O course was not timed.

Results from the two timed events are as follows:

2.7 km Yellow course (7 controls)

1. Casey and Danielle Fagerquist 1:12:00

4.2 km Orange course (11 controls)

1. Jim Green 1:30:40

2. Jordan Laughlin 2:09:00

3. Tim Jaronik 2:13:00

We had approximately 20 people sign up for Yellow and most didn't finish - but had fun. We had about 5 sign up for Orange. Orienteering at night is far more difficult than most people think it is - especially in Campbell Tract where it is so dark (away from city lights).
